

Fund Commentary and Strategy

Markets pulled back in February as stronger economic data increased the risk that rates have to stay higher for longer. The Dow Jones Islamic Market ("DJIM") World Index fell by -2.34% and the MSCI All Country World Index ("ACWI") fell by -2.83% (both in USD terms) for the month of February. The Fund's NAV for Class B, was largely flat, declining by -0.12% helped by ringgit weakening by c5%. Equity investments contributed +0.29%, sukuk and gold investments contributed -0.34%.

Equity Contribution +0.29%

The equity book significantly underperformed the DJIM World Index, driven by the selloff in China stocks post Chinese New year. Uncertainty around the speed of the reopening and government policy after the National People's Congress in March led to the weaker performance. As for the US and Europe, stronger economic data and sticker inflation has pushed terminal rates higher and for longer, causing equity markets to pull back. Equities still looks expensive relative to the movement in bonds. As such, risk reward still looks unattractive for us to be deploying more capital into Equities. Equity allocation (ex-energy) remains at c41%.

Fixed Income & Gold Contribution -0.34%

Our sukuk and money market investments via the Collective Investment Scheme ("CIS") namely Nomura i-Income Fund 2, Dow Jones Global Sukuk ETF and Nomura i-Cash Fund contributed -0.34%. Whilst domestic sukuk contributed positively, returns in global sukuk was negative as US terminal rates continue to rise. Given the volatility of the US Dollar vs. the Ringgit, the fund is now holding the Global Sukuk on a hedged basis. Gold contributed -0.13% to fund performance as higher rates are pushing real yields higher.

Cash +0%

The Fund utilised cash on hand to allocate further into domestic sukuk and as such, have no material contribution for the month.

Summary

We continue to be defensive with our asset allocation, keeping a lower allocation to equities and continue to build a higher allocation to sukuk investments and money markets (via CIS and direct placements with banks). We continue to maintain c.3% exposure to the energy sector and wait for the opportunity to add to risk assets.
