

### Fund Manager's Commentary

In February, the domestic government bond market experienced a partial reversal of the previous month's strong rally, attributed to weaker signs of global inflation abating and major central banks potentially remaining hawkish for a longer period. The Government Investment Issue ("GII") yield curve steepened as the belly to long-end of the curve rose by 6-15 bps MoM. However, corporate sukuk performed better, resulting in narrower credit spreads as domestic real money investors sought higher yields.

Malaysia's gross domestic product ("GDP") continued to expand in 4Q2022, albeit at a slower rate than the previous quarter, by 7.0% (3Q2022: +14.2%) due to dissipating low base effects. The services sector (+8.9%) drove broad-based growth amid robust domestic demand and resilient labour market conditions, while sustained expansion was also observed in the manufacturing (+3.9%), mining & quarrying (+6.8%), agriculture (+1.1%), and construction sectors (+10.1%). Private consumption (+7.4%) remained the main driver of Malaysia's economic growth, with total investments, government spending, and net trade also contributing positively to the headline GDP.

The long-awaited Budget 2023 was retabled by Prime Minister and Finance Minister Datuk Seri Anwar Ibrahim, presenting a narrower fiscal deficit of 5.0% of GDP for 2023, down from the initial 5.5% of GDP tabled in October 2022, mainly attributed to higher nominal GDP and revenue targets. The government forecasts a GDP growth of 4.5% and inflation of 2.8-3.8% for 2023. From a rates perspective, Budget 2023 is viewed as mildly positive for the domestic bond market, with the lower fiscal deficit target, absence of EPF special withdrawal programmes, and no significant changes in subsidy policies.

In terms of strategy, the current steepness of the belly of the GII yield curve presents value, particularly as the 3-7 year portion remains steep, making for an attractive rolldown play. If yields continue to rise to levels that are deemed to offer value, cash will be deployed into short-dated GII to better position the portfolio for the year ahead.
