

**PRODUCT HIGHLIGHTS SHEET
NOMURA JAPAN SHARIAH ACTIVE CORE FUND
(THE “FUND”)**

Date of issuance: 17 October 2024

This Product Highlights Sheet is an important document.

- It highlights the key features and risks relating to the Fund and complements the Prospectus¹.
- It is important to read the Prospectus before deciding whether to purchase Units of the Fund. If you do not have a copy of the Prospectus, please contact us for a copy.
- You should not invest in the Fund if you do not understand or are not comfortable with the accompanying risks.
- For account-related matters and information regarding the Fund, kindly contact us, or the distributor from whom you purchased Units of the Fund.

This Product Highlights Sheet only highlights the key features and risks of the Fund. Investors are advised to request, read and understand the Prospectus before deciding to invest.

RESPONSIBILITY STATEMENT

This Product Highlights Sheet has been reviewed and approved by the directors or authorised committee or persons approved by the directors of *Nomura Asset Management Malaysia Sdn Bhd* and they collectively and individually accept full responsibility for the accuracy of the information. Having made all reasonable enquiries, they confirm to the best of their knowledge and belief, there are no false or misleading statements, or omission of other facts which would make any statement in the Product Highlights Sheet false or misleading.

STATEMENT OF DISCLAIMER

The Securities Commission Malaysia has authorised the issuance of the Fund and a copy of this Product Highlights Sheet has been lodged with the Securities Commission Malaysia.

The authorisation of the Fund and lodgement of this Product Highlights Sheet, should not be taken to indicate that the Securities Commission Malaysia recommends the Fund or assumes responsibility for the correctness of any statement made or opinion or report expressed in this Product Highlights Sheet.

The Securities Commission Malaysia is not liable for any non-disclosure on the part of *Nomura Asset Management Malaysia Sdn Bhd* responsible for the Fund and takes no responsibility for the contents of this Product Highlights Sheet. The Securities Commission Malaysia makes no representation on the accuracy or completeness of this Product Highlights Sheet, and expressly disclaims any liability whatsoever arising from, or in reliance upon, the whole or any part of its contents.

YOU SHOULD NOT MAKE PAYMENT IN CASH TO A UNIT TRUST CONSULTANT OR ISSUE A CHEQUE IN THE NAME OF A UNIT TRUST CONSULTANT.

¹ The Prospectus and accompanying supplemental prospectuses (if any) are available at the offices of Nomura Asset Management Malaysia Sdn Bhd and its authorised distributors during business hours.

Brief Information on the Product	
Type of Product	The Fund is an Islamic Japan equity fund managed by Nomura Asset Management Malaysia Sdn Bhd.
Product Suitability	
The Fund is for investors who are seeking for long-term capital growth and opportunities in Japanese companies. The Fund invests in companies either domiciled in Japan or deriving their earnings from Japan, which comply with Shariah.	
Key Product Features	
Class of Units	MYR Class USD Class
Launch Date	17 October 2024
Financial Year End	30 th June
Initial Offer Price	RM 1.0000 USD 1.0000
Minimum Initial Investment[^]	RM1,000 USD1,000
Minimum Additional Investment[^]	RM500 USD500
[^] subject to our discretion, you may negotiate for a lower amount.	
Investment Objective	The Fund aims to achieve long-term capital growth.
Performance Benchmark	90% DJIM Japan Index + 10% BNM Islamic Interbank Overnight Rate <i>Source:</i> DJIM Japan Index (www.djindexes.com) BNM Islamic Interbank Overnight Rate (BNM) <i>Note: The risk profile of the Fund is different from the risk profile of the performance benchmark. There is no guarantee that the Fund will outperform the benchmark. This composite benchmark is an appropriate performance benchmark for the Fund as the Fund is an Islamic equity fund which generally has an equity weight of 90% of its NAV over the long term. Unit Holders may also obtain information on the performance benchmark from us. Please refer to the Corporate Directory section of the Prospectus on page 1 for our contact details.</i>
Investment Strategy	<p>The Fund seeks to achieve its investment objective by investing a minimum of 70% of its NAV in Shariah-compliant equities and Shariah-compliant equity-related securities such as Shariah-compliant American Depositary Receipts, Shariah-compliant Global Depositary Receipts, Shariah-compliant rights issues and Shariah-compliant warrants of companies which are domiciled in Japan or companies which derive their earnings from Japan. Up to 30% of the Fund's NAV will be invested in Islamic liquid assets such as Islamic money market instruments, Islamic deposits and/or held in cash.</p> <p>The Fund may also invest a maximum of 20% of the Fund's NAV in Islamic collective investment schemes to access investment opportunities which are not available through direct investment in Shariah-compliant equities and Shariah-compliant equity-related securities.</p> <p>The Fund will invest in equities and equity-related securities which have been classified as Shariah-compliant by the Shariah Supervisory Board of DJIM Indices. If the equities and equity-related securities are not classified as Shariah-compliant by the Shariah Supervisory Board of DJIM Indices, the Shariah Adviser will review and determine the Shariah status of the equities and equity-related securities.</p> <p><u>Investment Philosophy</u> We have appointed Nomura Asset Management Co., Ltd. as the investment adviser of the Fund. The Investment Adviser will provide investment research and stock recommendation in accordance with the investment objective and within the investment restrictions and limits of the Fund.</p> <p>The Fund's investment philosophy is to combine both bottom–up and top-down strategies, with a bias towards individual stock selection. The investment style of the Fund is expected to be seen as an actively managed core approach that is not restricted by a strict style bias with the investment process designed to add value in all market conditions over a medium- to long-term time horizon. The investment process identifies differentiating companies with characteristics including but not limited to competitive strengths, strong</p>

	<p>profitability and consistent cash flow returns. With proprietary model, valuation framework is formed by incorporating the fundamental changes and historical valuations. The investment decision is executed with the considerations of risks and rewards.</p> <p>We may take temporary defensive positions that may be inconsistent with the Fund's principal strategy by reducing its investment into the Shariah-compliant equities, Shariah-compliant equity-related securities and Islamic collective investment schemes to raise liquidity levels of the Fund during adverse market condition and protect Unit Holders' interest. Similarly, we may raise liquidity levels if the liquidity profile of the investments changes significantly. In raising the Fund's liquidity levels, we may invest into Islamic deposits, Islamic money market instruments and/or hold cash.</p> <p><u>Islamic derivatives</u></p> <p>We may use Islamic derivatives such as Islamic foreign exchange forward contracts for hedging purposes. Islamic foreign exchange forward contracts may be used to hedge the principal and/or the returns of the foreign currency exposure of any Class(es) (except USD Class) against the Base Currency. The employment of Islamic derivatives under these circumstances is expected to reduce the impact of foreign currency movements on the Fund's NAV, irrespective of the currency classes. While the hedging strategy will assist with mitigating the potential foreign exchange losses by the Fund, any potential gains from the hedging will be capped as well.</p> <p>The Fund's global exposure from Islamic derivatives position will not exceed the Fund's NAV at all times. The global exposure of the Fund is calculated based on commitment approach as illustrated under the "Investment Restrictions and Limits" below.</p>
Distribution Policy	Distribution of income, if any, is incidental.
Mode of Distribution	<p>You may elect to receive the income distribution by way of reinvestment as additional Units into the Fund or cash payment.</p> <p>Any income distribution payable which is less than or equal to RM1,000.00 (or its equivalent amount in the currency denomination of the respective Class) will be automatically reinvested based on the NAV per Unit on the income payment date which is 3 Business Days after the income distribution date at no cost.</p>
The Parties Involved	
The Manager	Nomura Asset Management Malaysia Sdn Bhd
The Trustee	SCBMB Trustee Berhad
The Shariah Adviser	ZICO Shariah Advisory Services Sdn Bhd
The Investment Adviser	Nomura Asset Management Co., Ltd.
Asset Allocation	
70% - 100%	Shariah-compliant equities and Shariah-compliant equity-related securities
0% - 30%	Islamic money market instruments, Islamic deposits and/or held in cash
Key Risks	
<p>What are the possible outcomes of my investment?</p> <ul style="list-style-type: none"> The value of the Fund and the income that you may receive from your investment may fall or rise. There may be a risk that you may lose some or all of your investments. <p><i>FOR INFORMATION CONCERNING RISK FACTORS (INCLUDING THE SPECIFIC RISKS WHEN INVESTING IN COLLECTIVE INVESTMENT SCHEMES), WHICH YOU SHOULD CONSIDER, PLEASE REFER TO CHAPTER 4, "UNDERSTANDING THE RISKS OF THE FUND" OF THE PROSPECTUS (WHICH MAY BE AMENDED FROM TIME TO TIME).</i></p> <p><u>Specific Risks of the Fund</u></p> <p>Shariah-compliant Equity Risk</p> <p>Adverse price movements of any Shariah-compliant securities invested by the Fund may adversely affect the Fund's NAV. We strive to mitigate the impact of such Shariah-compliant securities risk through portfolio diversification.</p> <p>Meanwhile, when investing in Shariah-compliant equity-related securities such as Shariah-compliant American Depositary Receipts, Shariah-compliant Global Depositary Receipts, Shariah-compliant rights issues and Shariah-compliant warrants, where their price movement is dependent on the price movement of the underlying</p>	

of the Shariah-compliant equity-related securities, the risk is generally higher than their Shariah-compliant equities as these Shariah-compliant equity-related securities are a leveraged form of investment. The price of Shariah-compliant equity-related securities generally fluctuates more than the Shariah-compliant equities and consequently may affect the volatility of the Fund's NAV.

Shariah-compliant warrants are financial instruments that give the buyer the right but not the obligation to purchase or sell Shariah-compliant equities at a predetermined price before the expiry date. Such investment may experience time decay, and the erosion of value accelerates as the instrument advances to its expiry date.

Shariah non-compliant risk

This risk refers to the risk that the investments of the Fund do not conform to Shariah requirements. Should the situation arise, we will take the necessary steps to dispose of such investments in accordance with the rules of divestment of Shariah non-compliant investments. If this occurs, the Fund could suffer losses from the disposal and thus, adversely affecting the value of the Fund.

Liquidity Risk

Liquidity risk refers to the ease of liquidating an asset depending on the asset's volume traded in the market. If the Fund holds assets that are illiquid, or are difficult to dispose of, the value of the Fund will be negatively affected when it has to sell such assets at unfavourable prices.

The liquidity risk of the Fund also refers to our ability as manager to honour redemption requests or to pay Unit Holders' redemption proceeds in a timely manner. This is subject to the Fund's holding of adequate liquid assets, its ability to borrow on a temporary basis as permitted by the relevant laws and/or its ability to redeem the Fund's investments at fair value. Should there be inadequate liquid assets held, the Fund may not be able to honour requests for redemption or to pay Unit Holders' redemption proceeds in a timely manner and may be forced to dispose the Fund's investments at unfavourable prices to meet redemption requirements.

Single Country Risk

The Fund invests primarily in Shariah-compliant equities, Shariah-compliant equity-related securities of companies which are incorporated, listed in or have their area of primary activity in Japan. Therefore, any changes in Japan's economic fundamentals, social and political stability, currency movements and foreign investment policies may have an impact on the process of the securities that the Fund invests in, which in turn may affect the NAV of the Fund. Exposure to a single country, may also increase potential volatility of the Fund due to the increased geographical concentration risk as they are less diversified geographically compared to funds investing in the regional or global markets.

Currency Risk

As the base currency of the Fund is denominated in USD and the investments of the Fund and the currency denomination of the Classes may be denominated in other than USD, the investments of the Fund and the Classes not denominated in USD are exposed to currency risk.

Any fluctuation in the exchange rates between USD and the currencies in which the investments of the Fund are denominated may have an impact on the value of these investments. Investors should be aware that if the currencies in which the investments are denominated depreciate against the Base Currency, this will have an adverse effect on the NAV of the Fund in the Base Currency and vice versa. Any gains or losses arising from the fluctuation in the exchange rate may further increase or decrease the returns of the investment. The impact of the exchange rate movement between the Base Currency and the currency of the underlying investments may result in a depreciation of the value of the investments as expressed in the Base Currency.

Any fluctuation in the exchange rates between USD and the currency denomination of the Class (other than Classes denominated in USD) will affect the Unit Holder's investments in those Classes (other than Classes denominated in USD). The impact of the exchange rate movement between the Base Currency and the currency denomination of the Class (other than Classes denominated in USD) may result in a depreciation of the Unit Holder's holdings as expressed in the Base Currency.

In order to manage currency risk, we may employ currency hedging strategies to fully or partially hedge the foreign currency exposure of the Fund's investments and/or the Classes not denominated in USD. Currency hedging may reduce the effect of the exchange rate movement for the Class being hedged but it does not entirely eliminate currency risk between the Class and the Base Currency. The unhedged portion of the Class will still be affected by the exchange rate movements and it may cause fluctuation of NAV of the Class. You should note that if the exchange rate moves favourably, the Class will not benefit from any upside in currency movement due to the hedging strategy. In addition, hedging is subject to a minimum size of entering into a

hedging contract and the cost of hedging will be borne by the hedged class and may affect returns of the hedged class.

Default Risk

Default risk relates to the risk that an issuer of an Islamic money market instrument either defaulting on payments or failing to make payments in a timely manner which will in turn adversely affect the value of the Islamic money market instruments. If the financial institution which the Fund places Islamic deposits with defaults in payment or become insolvent, the Fund may also suffer capital losses with regards to the capital invested and profits foregone, causing the performance of the Fund to be adversely affected. This could affect the value of the Fund as up to 30% of the NAV of the Fund will be invested in Islamic deposits, Islamic money market instruments and/or held in cash.

OTC Counterparty Risk

OTC counterparty risk is the risk associated with the other party to an OTC Islamic derivative transaction not meeting its obligations. If the counterparty to the OTC Islamic derivative transaction is unable to meet or otherwise defaults on its obligations (for example, due to bankruptcy or other financial difficulties), the Fund may be exposed to significant losses greater than the cost of the Islamic derivatives. The risk of default of a counterparty is directly linked to the creditworthiness of that counterparty. Should there be a downgrade in the credit rating of the OTC Islamic derivatives' counterparty, we will evaluate the situation and reassess the creditworthiness of the counterparty. We will take the necessary steps in the best interest of the Fund.

Related Party Transaction Risk

The Fund may invest in Islamic collective investment schemes of other asset management companies which are related to us and may also have dealings with parties related to these companies. Such related party transactions may potentially result in conflict of interests between the Unit Holders and us. In managing such conflict of interests, all transactions with related parties will be executed on terms which are best available to the Fund and based on best execution and at arms-length transaction between independent parties.

Reclassification of Shariah-compliant Status

Shariah-compliant securities and instruments held by the Fund are subject to periodic review by the SAC of the SC, SAC of BNM, the Shariah boards of the relevant Islamic indices or the Shariah Adviser, where applicable. These securities and instruments may be reclassified as non-compliant during such reviews and the Fund may need to take the necessary steps to dispose of such securities or instruments, upon the advice of the Shariah Adviser. Consequently, the Fund may realise some losses in the disposal of the same or there may be opportunity loss for the Fund as the Fund may not be permitted to retain excess capital gains derived from such disposal. Please refer to section 9.4 of the Prospectus for Shariah Investment Guidelines adopted by the Shariah Adviser on the rules on disposal of Shariah non-compliant securities and instruments.

Investments in Islamic Collective Investment Schemes

Investing in Islamic collective investment schemes may be more costly to the Fund than if the Fund had invested in the underlying investments directly as the Fund will indirectly be paying the fees and expenses of the Islamic collective investment schemes in addition to the Fund's direct fees and expenses. Investing in other Islamic collective investment schemes may subject the Fund to the risk that (i) the valuations of the Fund may not reflect the true value of the underlying Islamic collective investment schemes at a specific time and/or (ii) the valuation of the underlying Islamic collective investment schemes may not be available as at the relevant valuation point for the Fund which could result in significant losses or inaccurate pricing for the Fund. The Fund's investments in Islamic collective investment schemes may also subject the Fund to additional risks (such as risk associated with the investment manager of the Islamic collective investment scheme) than if the Fund would have invested directly in the underlying investment of the Islamic collective investment schemes. The risk associated with the investment manager of the Islamic collective investment schemes includes but is not limited to the risk of non-adherence to the investment objective, strategy and policies of the Islamic collective investment schemes, the risk of direct or indirect losses resulting from inadequate or failed operational and administrative processes and systems of the investment manager of the Islamic collective investment schemes, and the risk that the Islamic collective investment schemes may underperform due to poor investment decisions by the investment manager of the Islamic collective investment schemes.

Any adverse price movement of such Islamic collective investment schemes will adversely affect the Fund's NAV.

Risks Associated With the Use of Accretion or Amortised Cost Accounting

We are using accretion or amortised cost accounting to value Islamic money market instruments with remaining term to maturity of not more than 90 days at the time of acquisition. Accretion or amortised cost accounting is an accounting process used to adjust the value between the purchase date and maturity date of an Islamic money market instruments that has been bought at a discounted rate or premium. Accretion is the accumulation of paper value on a discounted Islamic money market instruments until it reaches maturity. Where amortisation is used to calculate the yield at any given time of an Islamic money market instruments bought at a premium, it is the writing off of the investment's premium over its projected life until maturity.

We have delegated the fund accounting and valuation services of the Fund to the Trustee. There may be a possibility of incorrect valuation performed by the Trustee due to human error or system failure. To mitigate this risk, we have our own set of accretion or amortised cost accounting to reconcile the accretion or amortised cost performed by the Trustee on a daily basis. Should the difference in valuation exceeds the threshold of 0.05%, we will perform an investigation on the Trustee's valuation.

THE ABOVE SHOULD NOT BE CONSIDERED TO BE AN EXHAUSTIVE LIST OF THE RISKS WHICH INVESTORS SHOULD CONSIDER BEFORE INVESTING INTO THE FUND. INVESTORS SHOULD BE AWARE THAT AN INVESTMENT IN THE FUND MAY BE EXPOSED TO OTHER RISKS FROM TIME TO TIME.

YOU SHOULD RELY ON YOUR OWN EVALUATION TO ASSESS THE MERITS AND RISKS OF AN INVESTMENT. YOU SHOULD READ AND UNDERSTAND THE CONTENTS OF THE PROSPECTUS AND, IF NECESSARY, CONSULT YOUR ADVISER(S) BEFORE MAKING AN INVESTMENT DECISION.

Fees and Charges

Sales Charge	MYR Class	Up to 5.00% of the NAV per Unit.
	USD Class	
Redemption Charge	Nil.	
Switching Fee	Nil.	
Transfer Fee	Nil.
