(1) Figures shown as ex-distribution.

(2) Total Return of the Fund and its Benchmark for a period are calculated based on the absolute return of the Fund for that period. The calculation of the Total Return of the Fund is based on NAV-to-NAV basis, and is sourced from LSEG Lipper. Fund performances include reinvestment of income distributions into the Fund. The performance figures are a comparison of the growth/decline in NAV for the stipulated period taking into account all the distributions payable (if any) during the stipulated period:

- **Capital Return**= {NAV per Unit End / NAV per Unit Beginning – 1} x 100
- **Income Return**= {Income Distribution per Unit / NAV per Unit Ex-Distribution} x 100

(3) Total Expense Ratio (“TER”) is calculated based on the total fees and expenses incurred by the Fund divided by the average net asset value of the Fund for the financial period calculated on daily basis.

(4) Portfolio Turnover Ratio (“PTR”) is calculated based on the total acquisitions and total disposals of investment securities of the Fund for the financial period divided by the average net asset value of the Fund for the financial period calculated on daily basis.

### 3.2 Review of Market for the period from 1 October 2025 to 31 March 2026

This semi-annual period was drastically split into two halves, shifting from an uneasy macro equilibrium in late 2025 to an acute global geopolitical and energy crisis by the end of March 2026. In the final quarter of 2025, global equity markets experienced a period of relative consolidation; while a series of localized Middle Eastern conflicts simmered, their economic impact remained largely contained within the region, allowing corporate earnings and secular growth themes—particularly in technology and digital infrastructure—to support asset valuations.

However, market sentiments turned decisively bearish at the turn of the year, culminating in a severe global market capitulation in March 2026. The outbreak of open, full-scale warfare involving the US/Israel and Iran completely upended global trade. Unlike the contained flashpoints of 2025, this conflict triggered a severe global energy crisis as the sudden closure of the Strait of Hormuz effectively severed the global economy from its primary oil supply.

This supply shock was compounded by retaliatory Iranian missile and drone strikes targeting critical energy infrastructure across neighboring oil-rich Gulf states, alongside heavy damage inflicted on Iran's own domestic energy facilities by US and Israeli forces. As a direct result of this localized destruction and supply chokepoint, crude oil prices rapidly spiked past USD 100 per barrel.

Fixed income markets and foreign exchange experienced severe volatility as a consequence of this geopolitical shock. Having stabilized through the end of 2025, US Treasury yields surged dramatically into the end of March 2026, spiking by 38 basis points in the final month alone to close at 4.32%. This fixed-income sell-off reflected a rapid repricing of macro risks, as soaring energy costs stoked deep fears of runaway structural inflation. Over the review period, the MYR strengthened against the USD by +3.74%.

Monetary policy expectations were completely rewritten over the six months. While the Federal Reserve had previously maintained a stable stance on the back of modestly improving labor data, the sudden, war-induced energy shock forced central banks into a corner. Facing severe inflation uncertainty and soaring commodity inputs, financial markets were forced to completely price out any anticipated Federal Reserve interest rate cuts for the remainder of 2026. Stripped of near-term monetary easing and grappling with a heavily disrupted global energy supply chain, investors aggressively de-risked across all major geographical theaters, triggering a broad-based, deep market tailspin into the close of the period on March 31, 2026.

### 3.3 Investment Outlook

With regards to the equities positioning, we adopt a barbell approach, seeking strike a balance between defensive positioning while still maintaining exposure to sectors that are in secular growth mode. We remain skewed towards growth sectors with resilient earnings in spite of the macroeconomic “noise”, such as Information Technology and Healthcare. Given higher geopolitical risks, we have diversified our geographical diversification into the EU and Japan. We will continue to maintain sizeable allocation to sukuk investments (via CIS) and money market placements.

### 3.4 Strategies Employed for the period from 1 October 2025 to 31 March 2026

During the period under review, the Fund remained closely aligned with its investment philosophies and process. From 1st October 2025 to 31st March 2026, the equity weight for the Fund averaged at 54%. To maintain a defensive allocation for the Fund, the cash held averaged at a 13% whilst the remainder of approximately 29% was held in Sukuk investments (via multiple collective investment schemes). During the period, the fund was invested into precious metals via a 4% allocation to a Gold ETF, as precious metals rallied on the de-dollarisation trade. Cash and fixed income are still attractive given that interest rates are elevated by historical standards.

### 3.5 Asset Allocation

Asset Allocation / Portfolio Composition	31 Mar 2026	30 Sep 2025	30 Sep 2024	30 Sep 2023
Equity Securities	33.59%	59.51%	55.28%	35.70%

## NOMURA GLOBAL SHARIAH STRATEGIC GROWTH FUND

### MATERIAL ACCOUNTING POLICY INFORMATION FOR THE FINANCIAL PERIOD FROM 01 OCTOBER 2025 TO 31 MARCH 2026 (UNAUDITED)

The following accounting policies have been used in dealing with items which are considered material in relation to the financial statements.

#### A BASIS OF PREPARATION OF THE FINANCIAL STATEMENTS

The financial statements have been prepared in accordance with the Malaysian Financial Reporting Standards (“MFRS”) and International Financial Reporting Standards. The financial statements have been prepared under the historical cost convention, as modified by the revaluation of financial assets and financial liabilities (including derivative financial instruments) at fair value through profit or loss.

The preparation of financial statements in conformity with the MFRS and International Financial Reporting Standards requires the use of certain critical accounting estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reported financial period. It also requires the Manager to exercise their judgement in the process of applying the Fund’s accounting policies. Although these estimates and judgement are based on the Manager’s best knowledge of current events and actions, actual results may differ.

The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the financial statements are disclosed in Note L to the financial statements.

- (i) Standards, amendments to published standards and interpretations that are applicable and effective:
  - There are no standards, amendments to standards or interpretations that are applicable and effective for annual periods beginning on 1 February 2025 that have a material effect on the financial statements of the Fund.
- (ii) Standards and amendments that have been issued that are applicable to the Fund but not yet effective:
  - Amendments to MFRS 9 and MFRS 7 ‘Amendments to the Classification and Measurement of Financial Instruments’ (effective 1 January 2026):
    - The amendments clarify that financial assets are derecognised when the rights to the cash flows expire or when the asset is transferred, and financial liabilities are derecognised at the settlement date (i.e. when the liability is extinguished or qualifies for derecognition.);
    - There is an optional exception to derecognise a financial liability at a date earlier than the settlement date if the cash transfer takes place through an electronic payment system, provided that all the specified criteria are met;
    - The amendments also clarify and add further guidance for assessing whether a financial asset meets the solely payments of principal and interest (“SPPI”) criterion;
    - There are additional new disclosures for certain instruments with contractual terms that can change cash flows (such as some financial instruments with features linked to the achievement of environment, social and governance targets); and
    - The amendments update the disclosures for equity instruments designated at fair value through other comprehensive income (“FVOCI”).

### MATERIAL ACCOUNTING POLICY INFORMATION FOR THE FINANCIAL PERIOD FROM 01 OCTOBER 2025 TO 31 MARCH 2026 (UNAUDITED)

The following accounting policies have been used in dealing with items which are considered material in relation to the financial statements.

#### A BASIS OF PREPARATION OF THE FINANCIAL STATEMENTS (CONTINUED)

(ii) Standards and amendments that have been issued that are applicable to the Fund but not yet effective : (continued)

- Annual Improvements to MFRS Accounting Standards for enhanced consistency (effective 1 January 2026)
- MFRS 18 'Presentation and Disclosure in Financial Statements' (effective 1 January 2027) replaces MFRS 101 'Presentation of Financial Statements'.
  - The new MFRS introduces a new structure of profit or loss statement.
    - (a) Income and expenses are classified into 3 new main categories:
      - i. Operating category which typically includes results from the main business activities;
      - ii. Investing category that presents the results of investments in associates and joint ventures and other assets that generate a return largely independently of other resources; and
      - iii. Financing category that presents income and expenses from financing liabilities.
    - (b) Entities are required to present two new specified subtotals: 'Operating profit or loss' and 'Profit or loss before financing and income taxes'.
  - Management-defined performance measures are disclosed in a single note and reconciled to the most similar specified subtotal in MFRS Accounting Standards.
  - Changes to the guidance on aggregation and disaggregation which focus on grouping items based on their shared characteristics.

The Fund is currently still assessing the effect of the above standards and amendments. No other new standards or amendments to standards are expected to have a material effect on the financial statements of the Fund.

#### B INCOME RECOGNITION

Profit income from Islamic deposits with licensed financial institutions is recognised on an accrual basis using the effective profit method.

Profit income is calculated by applying the effective profit rate to the gross carrying amount of a financial asset except for financial assets that subsequently become credit-impaired. For credit-impaired financial assets, the effective profit rate is applied to the net carrying amount of the financial asset (after deduction of the loss allowance).

Dividend income from quoted Shariah-compliant investments, Islamic collective investment scheme and Shariah-compliant exchange traded funds are recognised when the Fund's right to receive payment is established. Dividend income is received from financial assets measured at FVTPL.

Realised gain or loss on sale of quoted Shariah-compliant investments, Islamic collective investment scheme and Shariah-compliant exchange traded funds are accounted for as the difference between

#### B INCOME RECOGNITION (CONTINUED)

the net disposal proceeds and the carrying amount of the investments, determined on a weighted average cost basis.

Realised gain or loss on Islamic forward foreign currency contracts are measured by the net settlement amount as per the Islamic forward foreign currency contract.

#### C TAXATION

Current tax expense is determined according to the Malaysian tax laws at the current rate based upon the taxable profits earned during the financial period.

Tax on investment income from foreign quoted Shariah-compliant investments is based on the tax regime of the respective countries that the Fund invests in.

#### D FUNCTIONAL AND PRESENTATION CURRENCY

Items included in the financial statements of the Fund are measured using the currency of the primary economic environment in which the Fund operates (the “functional currency”). The financial statements are presented in Ringgit Malaysia (“MYR”), which is the Fund’s functional and presentation currency.

Due to mixed factors in determining the functional currency of the Fund, the Manager has used its judgment to determine the functional currency that most faithfully represents the economic effects of the underlying transactions, events and conditions and have determined the functional currency to be in MYR primarily due to the following factors:

- (i) The Fund’s units are denominated in MYR.
- (ii) Significant portion of the Fund’s cash is denominated in MYR for the purpose of making settlement of foreign trades and expenses.
- (iii) Significant portion of the Fund’s expenses are denominated in MYR.

#### Transaction and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions or valuation where items are re-measured. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at period-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in statement of comprehensive income, except when deferred in other comprehensive income as qualifying cash flow hedges.

#### E FINANCIAL ASSETS AND FINANCIAL LIABILITIES

##### (i) Classification

The Fund classifies its financial assets in the following measurement categories:

- those to be measured at fair value through profit or loss, and
- those to be measured at amortised cost

## NOMURA GLOBAL SHARIAH STRATEGIC GROWTH FUND

### MATERIAL ACCOUNTING POLICY INFORMATION FOR THE FINANCIAL PERIOD FROM 01 OCTOBER 2025 TO 31 MARCH 2026 (UNAUDITED) (CONTINUED)

#### E FINANCIAL ASSETS AND FINANCIAL LIABILITIES (CONTINUED)

##### (i) Classification (continued)

The Fund classifies its investments based on both the Fund's business model for managing those financial assets and the contractual cash flow characteristics of the financial assets. The portfolio of financial assets is managed and performance is evaluated on a fair value basis. The Fund is primarily focused on fair value information and uses that information to assess the assets' performance and to make decisions.

The Fund has not taken the option to irrevocably designate any equity securities as fair value through other comprehensive income. The contractual cash flows of the Fund's debt securities are solely principal and interest ("SPPI"). However, these securities are neither held for the purpose of collecting contractual cash flows nor held both for collecting contractual cash flows and for sale. The collection of contractual cash flows is only incidental to achieving the Fund's business model's objective. Consequently, all investments and derivatives not designated as hedging instruments are measured at fair value through profit or loss.

Investments in CIS have contractual cash flows that do not represent SPPI, and therefore are classified as fair value through profit or loss.

The Fund classifies cash and cash equivalents, amount due from Manager, amount due from broker and dividends receivable as financial assets at amortised cost as these financial assets are held to collect contractual cash flows that represent SPPI.

The Fund classifies amount due to broker, amount due to Manager, amount due to Trustee, amount due to Shariah Adviser, auditors' remuneration and tax agent's fee as financial liabilities measured at amortised cost.

##### (ii) Recognition and measurement

Regular purchases and sales of financial assets are recognised on the trade-date – the date on which the Fund commits to purchase or sell the asset. Investments are initially recognised at fair value.

Financial liabilities, within the scope of MFRS 9, are recognised in the statement of financial position when, and only when, the Fund becomes a party to the contractual provisions of the financial instrument.

Financial assets are derecognised when the rights to receive cash flows from the investments have expired or have been transferred and the Fund has transferred substantially all risks and rewards of ownership.

Financial liabilities are derecognised when it is extinguished, i.e. when the obligation specified in the contract is discharged or cancelled or expired.

Gains or losses arising from changes in the fair value of the 'financial assets at fair value through profit or loss' category including the effects of foreign transactions are presented in the statement of comprehensive income within 'net gain or loss on financial assets at fair value through profit or loss' in the period which they arise.

## NOMURA GLOBAL SHARIAH STRATEGIC GROWTH FUND

### MATERIAL ACCOUNTING POLICY INFORMATION FOR THE FINANCIAL PERIOD FROM 01 OCTOBER 2025 TO 31 MARCH 2026 (UNAUDITED) (CONTINUED)

#### E FINANCIAL ASSETS AND FINANCIAL LIABILITIES (CONTINUED)

##### (ii) Recognition and measurement (continued)

Investments in Islamic collective investment schemes are valued at the last published net asset value (“NAV”) per unit at the date of the statement of financial position.

Quoted Shariah-compliant investments and Shariah-compliant exchange traded funds are initially recognised at fair value and subsequently re-measured at fair value based on the market price quoted on the relevant stock exchanges at the close of the business on the valuation day, where the close price falls within the bid-ask spread. In circumstances where the close price is not within the bid-ask spread, the Manager will determine the point within the bid-ask spread that is most representative of the fair value.

If a valuation based on the market price does not represent the fair value of the securities, for example during abnormal market conditions or when no market price is available, including in the event of a suspension in the quotation of the securities for a period exceeding 14 days, or such shorter period as agreed by the Trustee, then the securities are valued as determined in good faith by the Manager, based on the methods or bases approved by the Trustee after appropriate technical consultation.

Financial assets at amortised cost and other financial liabilities are subsequently carried at amortised cost using the effective interest method.

##### (iii) Impairment

The Fund’s financial assets measured at amortised cost are subject to expected credit losses. The Fund measures credit risk and expected credit losses using probability of default, exposure at default and loss given default. The Manager considers both historical analysis and forward-looking information in determining any expected credit loss. The Manager considers the probability of default to be close to zero as these instruments have a low risk of default and the counterparties have a strong capacity to meet their contractual obligations in the near term. As a result, no loss allowance has been recognised based on 12 month expected credit losses as any such impairment would be wholly insignificant to the Fund.

##### Significant increase in credit risk

A significant increase in credit risk is defined by management as any contractual payment which is more than 30 days past due.

##### Definition of default and credit-impaired financial assets

The Fund defines a financial instrument as default, which is fully aligned with the definition of credit-impaired, when it meets one or more of the following criteria:

##### Quantitative criteria:

Any contractual payment which is more than 90 days past due is considered credit impaired.

#### E FINANCIAL ASSETS AND FINANCIAL LIABILITIES (CONTINUED)

##### (iv) Impairment (continued)

###### Definition of default and credit-impaired financial assets (continued)

The Fund defines a financial instrument as default, which is fully aligned with the definition of credit-impaired, when it meets one or more of the following criteria: (continued)

###### Qualitative criteria:

The debtor meets unlikeliness to pay criteria, which indicates the debtor is in significant financial difficulty. The Fund considers the following instances:

- the debtor is in breach of financial covenants
- concessions have been made by the lender relating to the debtor's financial difficulty
- it is becoming probable that the debtor will enter bankruptcy or other financial reorganisation
- the debtor is insolvent

Financial instruments that are credit-impaired are assessed on individual basis.

###### Write-off

The Fund writes off financial assets, in whole or in part, when it has exhausted all practical recovery efforts and has concluded there is no reasonable expectation of recovery. The assessment of no reasonable expectation of recovery is based on unavailability of debtor's sources of income or assets to generate sufficient future cash flows to repay the amount.

The Fund may write-off financial assets that are still subject to enforcement activity. Subsequent recoveries of amounts previously written off will result in bad debt recoveries. There are no write-offs/recoveries during the financial period.

#### F CASH AND CASH EQUIVALENTS

For the purpose of statement of cash flows, cash and cash equivalents comprise cash and bank balance and deposits with licensed financial institutions with original maturities of three months or less that is readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

#### G AMOUNT DUE FROM/(TO) BROKER

Amount due from and to broker represent receivables for securities sold and payables for securities purchased that have been contracted for but not yet settled or delivered on the statement of financial position date respectively. The due from broker balance is held for collection. Refer to Note F for accounting policy on recognition and measurement.

Any contractual payment which is more than 90 days past due is considered credit impaired.

Significant financial difficulties of the broker, probability that the broker will enter bankruptcy or financial reorganisation, and default in payments are all considered indicators that a loss allowance may be required.

#### H CREATION AND CANCELLATION OF UNITS

The unit holders' contributions to the Fund meet the definition of puttable instruments classified as financial liability under MFRS 132 "Financial Instruments: Presentation".

The Fund issues cancellable units, in two classes of units, known respectively as the Class A and Class B, which are cancelled at the unit holders' option and do not have identical features. The units are classified as financial liabilities. Cancellable units can be put back to the Fund at any time for cash equal to a proportionate share of the Fund's NAV of respective classes. The outstanding units are carried at the redemption amount that is payable at the date of the statement of financial position if the unit holders exercise the right to put back the unit to the Fund.

Units are created and cancelled at the unit holder's option at prices based on the Fund's NAV per unit of respective classes at the close of business on the relevant dealing day. The Fund's NAV per unit of respective classes is calculated by dividing the net assets attributable to unit holders of respective classes with the total number of outstanding units of respective classes.

#### I DERIVATIVE FINANCIAL INSTRUMENTS

A derivative financial instrument is any contract that gives rise to both a financial asset of one enterprise and a financial liability or equity instrument of another enterprise.

The Fund's derivative comprise Islamic forward foreign currency contracts. Derivatives are initially recognised at fair value on the date a derivative contract is entered into and are subsequently re-measured at their fair value. Financial derivative positions will be "marked to market" at the close of each valuation day. Foreign exchange gains and losses on the derivative are recognised in profit or loss when settled or at the date of the statement of financial position at which time they are included in the measurement of the derivative. Derivative instruments that have a negative fair value are presented as liabilities as fair value through profit or loss.

The fair value of Islamic forward foreign currency contracts is determined using forward exchange rates on the date of the statement of financial position, with the resulting value discounted back to present value.

The method of recognising the resulting gain or loss depends on whether the derivative is designated as a hedging instrument, and the nature of the item being hedged. Derivatives that do not qualify for hedge accounting are classified as financial assets/liabilities at fair value through profit or loss.

#### J DISTRIBUTIONS

Distributions are at the discretion of the Fund. A distribution to the Fund's unit holders is accounted for as a finance cost in the statement of comprehensive income, when they are appropriately authorised and no longer at the discretion of the Fund. A proposed distribution is recognised as a liability in the year in which it is approved by the Trustee.

#### K INCREASE/(DECREASE) IN NET ASSETS ATTRIBUTABLE TO UNIT HOLDERS

Income not distributed is included in net assets attributable to unit holders.

#### L CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS IN APPLYING ACCOUNTING POLICIES

The Fund makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, rarely equal the related actual results. To enhance the information contents on the estimates, certain key variables that are anticipated to have material impacts to the Fund's results and financial position are tested for sensitivity to changes in the underlying parameters.

Estimates and judgments are continually evaluated by the Manager and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

In undertaking any of the Fund's investment, the Manager will ensure that all assets of the Fund under management will be valued appropriately, that is at fair value and in compliance with the Securities Commission's ("SC") Guidelines on Unit Trust Funds.

#### M REALISED AND UNREALISED PORTIONS OF INCREASE OR DECREASE IN NET ASSETS ATTRIBUTABLE TO UNIT HOLDERS

The analysis of realised and unrealised amount in increase or decrease in net assets attributable to unit holders as presented on the statement of comprehensive income is prepared in accordance with Securities Commission's ("SC") Guidelines on Unit Trust Funds.

## NOTES TO THE FINANCIAL STATEMENTS FOR THE FINANCIAL PERIOD FROM 01 OCTOBER 2025 TO 31 MARCH 2026 (UNAUDITED)

### 1 INFORMATION ON THE FUND

Nomura Global Shariah Strategic Growth Fund (the “Fund”) was constituted pursuant to the execution of a Deed dated 17 April 2020 (the “Principal Deed”) entered into between Nomura Asset Management Malaysia Sdn Bhd (the “Manager”) and Deutsche Trustees Malaysia Berhad (the “Trustee”).

The Fund commenced operations on 22 May 2020 and will continue its operations until terminated by the Manager or the Trustee as provided under Clause 12 the Deed.

The Supplemental Deed dated 14 June 2022 in respect of the Fund (the “Deed”) was entered into between the Manager and the Trustee to govern the Fund and replace in its entirety the Principal Deed and the provision of the Principal Deed.

The Fund was converted into a Unit Trust on 1 October 2022 and will continue its operations until terminated by the Manager or the Trustee as provided under Clause 12 the Deed.

All investments will be subjected to the SC’s Guidelines on Unit Trust Funds, the Deed and the objective of the Fund.

The objective of the Fund is to achieve long-term capital growth, primarily through the Fund’s investments in foreign Shariah-compliant equities, sukuk, Islamic collective investment schemes and Islamic money markets instruments.

The Manager is a company incorporated in Malaysia. The principal activities of the Manager are establishment and management of unit trust funds and asset management including providing fund management services to private clients.

## NOTES TO THE FINANCIAL STATEMENTS FOR THE FINANCIAL PERIOD FROM 01 OCTOBER 2025 TO 31 MARCH 2026 (UNAUDITED) (CONTINUED)

### 2 FINANCIAL INSTRUMENTS, RISK MANAGEMENT OBJECTIVES AND POLICIES (CONTINUED)

The Fund is exposed to a variety of risks which include market risk (including price risk, interest rate risk and currency risk), credit risk, liquidity risk and capital risk.

Financial risk management is carried out through internal control processes adopted by the Manager and adherence to the investment restrictions as stipulated by the Securities Commission's ("SC") Guidelines on Unit Trust Funds.

#### Market risk

##### (a) Price risk

Price risk arises mainly from the uncertainty about future prices of investments. It represents the potential loss the Fund might suffer through holding market positions in the face of price movements. The Manager manages the risk of unfavourable changes in prices by continuous monitoring of the performance and risk profile of the investment portfolio.

The Fund's overall exposure to price risk was as follows:

	<u>2026</u> MYR	<u>2025</u> MYR
<b>Shariah-compliant quoted investment</b>		
Islamic collective investment scheme	7,879,572	1,955,946

	<u>23,175,523</u>	<u>11,954,051</u>

The following table summarises the sensitivity of the Fund's loss after taxation and NAV to price risk movements. The analysis is based on the assumptions that the market price increased by 5% and decreased by 5% with all other variables held constant. This represents management's best estimate of a reasonable possible shift in the quoted securities, having regard to the historical volatility of the prices.

##### Market risk (continued)

##### (b) Interest rate risk

Interest rate risk arises from the effects of fluctuations in the prevailing levels of market interest rates on the fair value of financial assets and liabilities and future cash flows.

The Fund's Islamic deposits with licensed financial institutions are short term in nature. Therefore, exposure to interest rate fluctuations is minimal.

##### (c) Currency risk

Currency risk is associated with investments denominated in foreign currencies. When the foreign currencies fluctuate in an unfavourable movement against Ringgit Malaysia, the investments will face currency losses in addition to the capital gain/(loss). The Manager will evaluate the likely directions of a foreign currency versus Ringgit Malaysia based on considerations of economic fundamentals such as interest rate differentials, balance of payments position, debt levels and technical chart considerations.

The following table sets out the foreign currency risk concentrations and counterparties of the Fund:

#### 2 FINANCIAL INSTRUMENTS, RISK MANAGEMENT OBJECTIVES AND POLICIES (CONTINUED)

##### Credit risk

Credit risk refers to the ability of an issuer or counterparty to make timely payments of interest, principals and proceeds from realisation of investment. The Manager manages the credit risk by undertaking credit evaluation to minimise such risk.

Credit risk arising from cash and bank balances is managed by ensuring that they are held by parties with credit rating of AA or higher.

The settlement terms of the proceeds from the creation of units receivable from the Manager are governed by the Securities Commission's ("SC") Guidelines on Unit Trust Funds.

The following table sets out the credit risk concentration and counterparties of the Fund:

##### Liquidity risk

The Fund maintains sufficient level of liquid assets, after consultation with the Trustee, to meet anticipated payments and cancellation of units by the unit holders. Liquid assets comprise cash, Islamic deposits with licensed financial institutions and other instruments which are capable of being converted into cash within 7 days. The Fund aims to reduce its liquidity risk by maintaining a prudent level of liquid assets.

The table below analyses the Fund's financial liabilities into relevant maturity groupings based on the remaining period at the statement of financial position date to the contractual maturity date.

The amounts in the table below are the contractual undiscounted cash flows.

## NOTES TO THE FINANCIAL STATEMENTS FOR THE FINANCIAL PERIOD FROM 01 OCTOBER 2025 TO 31 MARCH 2026 (UNAUDITED) (CONTINUED)

### 2 FINANCIAL INSTRUMENTS, RISK MANAGEMENT OBJECTIVES AND POLICIES (CONTINUED)

#### Capital risk

The capital of the Fund is represented by net assets attributable to unit holders of MYR43,082,795 (31.3.2025: MYR12,546,146). The amount of net assets attributable to unit holders can change significantly on a daily basis as the Fund is subject to daily subscriptions and redemptions at the discretion of unit holders. The Fund's objective when managing capital is to safeguard the Fund's ability to continue as a going concern in order to provide returns for unit holders and benefits for other stakeholders and to maintain a strong capital base to support the development of the investment activities of the Fund.

### 3 FAIR VALUE ESTIMATION

Financial instruments comprise financial assets and financial liabilities. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

The fair value of financial assets and liabilities traded in active market (such as publicly traded derivatives and trading securities) are based on quoted market prices at the close of trading on the reporting date.

An active market is a market in which transactions for the asset take place with sufficient frequency and volume to provide pricing information on an ongoing basis.

The fair value of financial assets that are not traded in an active market is determined by using valuation techniques.

#### (i) Fair value hierarchy

The table below analyses financial instruments carried at fair value. The different levels have been defined as follows:

- Quoted prices (unadjusted) in active market for identical assets or liabilities (Level 1)
- Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices) (Level 2)
- Inputs for the asset and liability that are not based on observable market data (that is, unobservable inputs) (Level 3)

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a Level 3 measurement. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgment, considering factors specific to the asset or liability.

The determination of what constitutes 'observable' requires significant judgment by the Fund. The Fund considers observable data to be that market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary and provided by independent sources that are actively involved in the relevant market.

### NOTES TO THE FINANCIAL STATEMENTS FOR THE FINANCIAL PERIOD FROM 01 OCTOBER 2025 TO 31 MARCH 2026 (UNAUDITED) (CONTINUED)

#### 3 FAIR VALUE ESTIMATION (CONTINUED)

(i) Fair value hierarchy (continued)

Financial instruments that trade in markets that are not considered to be active but are valued based on quoted market prices, dealer quotations or alternative pricing sources supported by observable inputs are classified within Level 2. These include Islamic forward foreign currency contracts. As Level 2 instruments include positions that are not traded in active markets and/or are subject to transfer restrictions, valuations may be adjusted to reflect illiquidity and/or non-transferability, which are generally based on available market information.

(ii) The carrying values of cash and cash equivalents, amount due from broker and amount due from Manager and all current liabilities, except for Islamic forward foreign currency contracts are a reasonable approximation of the fair values due to their short term nature.

#### 4 MANAGEMENT FEE

For the financial period from 1 October 2025 to 31 March 2026, the management fee is recognised at a rate of 1.20% per annum for Class A and 1.50% per annum for Class B on the NAV of each class of the Fund, calculated on a daily basis as stated in the Fund's Prospectus.

There will be no further liability to the Manager in respect of management fee other than the amounts recognised above.

#### 5 TRUSTEE FEE

For the financial period from 1 October 2025 to 31 March 2026, the Trustee fee is recognised at a rate of 0.04% per annum on the NAV of the Fund, exclusive of foreign custodian fees and charges, calculated on a daily basis for the financial period, or a minimum of MYR15,000 as stated in the Fund's Prospectus.

There will be no further liability to the Trustee in respect of Trustee fee other than the amounts recognised above.
