Brief Information on the Product	
Type of Product	This is an Islamic money market fund managed by Nomura Asset Management Malaysia Sdn Bhd.
Product Suitability	
The Fund is for investors who are seeking for a portfolio of investments that adhere to Shariah principles, require a high level of liquidity, have a short-term investment horizon of 1-year and below, and have a low risk tolerance.	
Key Product Features	
Launch Date	7 November 2012
Financial Year End	30 th April
Minimum Initial Investment[^]	RM10,000
Minimum Additional Investment[^]	RM5,000
[^] <i>subject to our discretion, you may negotiate for a lower amount or value.</i>	
Investment Objective	<p>The Fund seeks to provide investors with regular income distributions through investments in Islamic deposits, Islamic placement of money at call, general investment accounts and Islamic negotiable instruments.</p> <p><i>Any material change to the Fund's objective would require Unit Holders' approval.</i></p>
Performance Benchmark	<p>BNM Islamic Interbank Overnight Rate Source: www.bnm.gov.my</p> <p><i>Note: The risk profile of the Fund is different from the risk profile of the performance benchmark.</i></p>
Investment Strategy	<p>The Fund will be managed in accordance with Shariah requirements and thus the investments to be made by the Fund will also follow Shariah requirements. In that respect, the Fund will invest in Islamic deposits such as Islamic placement of money at call and/or Islamic money market instruments such as general investment accounts and Islamic negotiable instruments. The combination of these instruments may allow the Manager to obtain higher returns over a one year investment horizon compared to merely placing monies in Islamic deposits. The Manager will actively manage the permitted investments and maturity structure of the investments in the Fund to optimise return for investors in accordance to the interest rates outlook and analysis.</p> <p>The Fund performance relies on the professional judgment of the Manager to make decisions concerning the Fund's portfolio investments. The basic investment philosophy of the Manager is to seek to provide regular income distributions while preserving* capital and maintaining liquidity. The Manager believes that an important way to accomplish this is by analysing various factors, including the current and anticipated changes in interest rates; and economic statistics that could affect the investments undertaken by the Fund.</p> <p>The current and expected future economic environment is amongst the key factors that affect the monetary policy decision setting of any central bank. Amongst the tools that a central bank can employ to reflect its monetary policy stance include the setting of the interest rate level. During periods of lacklustre growth, the central bank may keep interest rates low to promote higher economic activity and conversely, raise rates if inflation is rising rapidly in a strong growth environment. By monitoring historical and forecasted economic statistics, the Manager can develop a view on potential changes in monetary policy moving forward and thus manage the duration of the permitted investments to account for those potential changes.</p> <p>The Fund generally adopts a hold-to-maturity policy as the Fund's investments are within one year investment horizon that only provides profits upon their maturity.</p> <p>The Fund will invest in Islamic deposits and/or Islamic money market instruments with financial institutions. The financial institutions are subject to a minimum credit rating of at least "A3" or "P2" by RAM Rating Services Berhad or an equivalent rating by Malaysian Rating Corporation Berhad at the point of placement or purchase. In the unlikely event of a credit rating downgrade, the Manager reserves the right to withdraw the Islamic deposits or Islamic money market instruments in the best interest of the investors within a reasonable time frame taking into consideration prevailing market conditions and factors.</p> <p><i>Note:</i></p>

	<i>* The Fund is not a capital guaranteed or capital protected fund and the returns are not guaranteed.</i>
Distribution Policy	Subject to the availability of realised income received from the investment, the Fund will distribute income at least once a month.
Mode of Distribution	You may elect to receive the income distribution by way of reinvestment as additional Units into the Fund or cash payment. Any income distribution payable which is less than or equal to RM1,000.00 will be automatically reinvested based on the NAV per Unit on the income payment date which is 2 Business Days after the income distribution date at no cost.

Key Risks	
What are the possible outcomes of my investment?	
<ul style="list-style-type: none"> The value of the Fund and the income that you may receive from your investment may fall or rise. There may be a risk that you may lose some or all of your investments. 	
<i>FOR INFORMATION CONCERNING RISK FACTORS (INCLUDING THE SPECIFIC RISKS WHEN INVESTING IN COLLECTIVE INVESTMENT SCHEMES), WHICH YOU SHOULD CONSIDER, PLEASE REFER TO CHAPTER 4, "UNDERSTANDING THE RISKS OF THE FUND" OF THE PROSPECTUS (WHICH MAY BE AMENDED FROM TIME TO TIME).</i>	
<u>Specific Risks of the Fund</u>	
Credit and Default Risk	
Credit risk relates to the creditworthiness of the issuers of the Islamic money market instruments and their expected ability to make timely payment of profit and/or principal. Any adverse situations faced by the issuer may impact the value as well as liquidity of the Islamic money market instruments. Default risk relates to the risk that an issuer of a Islamic money market instrument either defaulting on payments or failing to make payments in a timely manner which will in turn adversely affect the value of the Islamic money market instruments. If the financial institution which the Fund places Islamic deposits with defaults in payment or become insolvent, the Fund may also suffer capital losses with regards to the capital invested and profits foregone, causing the performance of the Fund to be adversely affected. This could affect the value of the Fund as up to 100% of the NAV of the Fund may be invested in Islamic deposits, Islamic money market instruments and/or held in cash.	
Interest Rate Risk	
Islamic deposits placed with financial institutions are subjected to the movement in the country's interest rate; in general, this corresponds to the central bank's overnight policy rate. The profit rates offered by the financial institutions are expected to be lower in a low interest rate environment.	
Liquidity Risk	
Liquidity risk refers to the ease of liquidating an asset depending on the asset's volume traded in the market. If the Fund holds assets that are illiquid, or are difficult to dispose of, the value of the Fund will be negatively affected when it has to sell such assets at unfavourable prices.	
The liquidity risk of the Fund also refers to our ability as manager to honour redemption requests or to pay Unit Holders' redemption proceeds in a timely manner. This is subject to the Fund's holding of adequate liquid assets, its ability to borrow on a temporary basis as permitted by the relevant laws and/or its ability to redeem the Fund's investments at fair value. Should there be inadequate liquid assets held, the Fund may not be able to honour requests for redemption or to pay Unit Holders' redemption proceeds in a timely manner and may be forced to dispose the Fund's investments at unfavourable prices to meet redemption requirements.	
Reinvestment Risk	
This is a risk that future proceeds (profit and/or capital) are reinvested at a lower potential profit rate for Islamic deposits which are placed with financial institutions. Reinvestment risk is especially evident during periods of falling profit rates where the profit payments are reinvested at a lower profit rate compared to the initial profit rate.	
Shariah Non-compliance Risk	
This risk refers to the risk that the Manager may wrongly invest in a Shariah non-compliant investment in the Fund. The said Shariah non-compliant investment will be withdrawn within one month of knowing the status of	

the investment. In the event the Shariah non-compliant investment resulted in gain (through gain and/ or profit), the gain is to be channelled to baitulmal and/or any other charitable bodies as advised by the Shariah Adviser.

Risks Associated With the Use of Accretion or Amortised Cost Accounting

We are using accretion or amortised cost accounting to value Islamic money market instruments with remaining term to maturity of not more than 90 days at the time of acquisition. Accretion or amortised cost accounting is an accounting process used to adjust the value between the purchase date and maturity date of an Islamic money market instruments that has been bought at a discounted rate or premium. Accretion is the accumulation of paper value on a discounted Islamic money market instruments until it reaches maturity. Where amortisation is used to calculate the yield at any given time of an Islamic money market instruments bought at a premium, it is the writing off of the investment's premium over its projected life until maturity.

We have delegated the fund accounting and valuation services of the Fund to the Trustee. There may be a possibility of incorrect valuation performed by the Trustee due to human error or system failure. To mitigate this risk, we have our own set of accretion or amortised cost accounting to reconcile the accretion or amortised cost performed by the Trustee on a daily basis. Should the difference in valuation exceeds the threshold of 0.05%, we will perform an investigation on the Trustee's valuation.

Suspension of Redemption Request Risk

Having considered the best interests of Unit Holders, the redemption requests by the Unit Holders may be subject to suspension due to exceptional circumstances, where the market value or fair value of a material portion of the Fund's assets cannot be determined. In such case, Unit Holders will not be able to redeem their Units and will be compelled to remain invested in the Fund for a longer period of time than original timeline. Hence, their investments will continue to be subject to the risks inherent to the Fund.

THE ABOVE SHOULD NOT BE CONSIDERED TO BE AN EXHAUSTIVE LIST OF THE RISKS WHICH INVESTORS SHOULD CONSIDER BEFORE INVESTING INTO THE FUND. INVESTORS SHOULD BE AWARE THAT AN INVESTMENT IN THE FUND MAY BE EXPOSED TO OTHER RISKS FROM TIME TO TIME.

YOU SHOULD RELY ON YOUR OWN EVALUATION TO ASSESS THE MERITS AND RISKS OF AN INVESTMENT. YOU SHOULD READ AND UNDERSTAND THE CONTENTS OF THE PROSPECTUS AND, IF NECESSARY, CONSULT YOUR ADVISER(S) BEFORE MAKING AN INVESTMENT DECISION.
