

Nomura Japan Shariah Active Core Fund - MYR Class
June 2026
Fund Commentary and Strategy

In June, MYR Class returned +5.00%, while the benchmark returned +3.83%, resulting in an outperformance of +1.17%. The Japanese equity market rose over the month, driven by growing expectations of easing tensions in the Middle East and gains in AI- and semiconductor-related stocks. In terms of style trends, the Growth index returned +3.49%, while the Value index returned +0.34% (Russell/Nomura indices). Growth stocks outperformed Value stocks, supported by the rise in semiconductor-related shares. The sector allocation effect was +0.73%, and the stock selection effect was +0.84% (FACTSET basis).

At the GICS sector level, the factor analysis showed that sector allocation contributed positively through Information Technology (Overweight), Health Care (Underweight), and Materials (Overweight), while Consumer Staples (Underweight) had negative impacts. In stock selection, Information Technology, Consumer Staples, and Health Care contributed positively, while Consumer Discretionary, Industrials, and Materials detracted.

Among individual holdings, TOKYO ELECTRON LIMITED, MURATA MANUFACTURING CO., LTD., and MITSUBISHI ELECTRIC CORPORATION (not held) contributed positively. Tokyo Electron rose on expectations that investment in semiconductor manufacturing equipment would increase, supported by higher memory chip prices. Murata Manufacturing also rose, as rapidly growing demand for MLCCs used in data centers led to expectations of higher MLCC prices and improved product mix at the company.

On the other hand, HITACHI, LTD., ASICS CORPORATION, and SUMITOMO ELECTRIC INDUSTRIES, LTD. detracted. Hitachi and Asics lagged and were not broadly favored in the risk-on market, which weighed on performance.

We initiated a new position in Kioxia Holdings, which was newly added to the benchmark, as we judged that the tightening supply-demand balance in semiconductor memory could support strong earnings growth over the medium term. We also increased the weight in Nissan Chemical Corporation, which has a stable earnings base in agrochemicals and animal health products and also holds a high share in semiconductor materials, while its share price still appears to have lagged.

On the other hand, we reduced the weights of Murata Manufacturing and Tokyo Electron, as we believe that although their high-growth earnings potential is unquestionable, their recent sharp share price increases have diminished their valuation appeal. The fund seeks to identify companies with strong competitiveness, growth potential, and the ability to achieve sustainably high ROE over the medium to long term, based on thorough analysis of long-term fundamentals, including structural industry trends.

We maintain a disciplined investment approach, avoiding distraction from short-term earnings fluctuations or share price movements.

We greatly appreciate your continued support.
