

Nomura Global Shariah Sustainable Equity Fund - MYR Class A
July 2026
Fund Commentary and Strategy

The first half of 2026 was characterized by market euphoria, though this was concentrated primarily within the information technology sector, specifically semiconductor and IT hardware industries. Certain industrial companies with exposure to electrification and power generation experienced comparable, albeit less pronounced, price appreciation. This period commenced with investor preference for AI exposure, resulting in substantial capital rotation into the IT sector, accompanied by heightened expectations that IT companies' earnings beats and guidance raises would almost certainly support linear upward share price movement and any dip would be viewed as buy the dip opportunity. While these expectations were met, the limited margin for error that we identified in the previous month's commentary unfortunately materialized throughout earnings season in July. Escalating investor concerns regarding peak AI capital expenditure growth and AI return on invested capital were amplified by Chinese open-source models alongside uncertain AI regulations from the US government, given multiple cybersecurity breach incidents involving AI agents from OpenAI and Anthropic. Market volatility was exacerbated by margin calls on leveraged positions, resulting in significant correction than anticipated in which the most severe underperformance during July was observed in Asia Pacific markets, including Taiwan, South Korea, and Japan. Conversely, US hyperscalers reported cloud growth acceleration and capital expenditure increases, prompting our assessment that the market's swing from extreme optimism to the opposite extreme likely to create price dislocation opportunities. We think that the structural AI trend will regain market confidence as additional application use cases emerge. Concurrently, we acknowledge that multiple unresolved debates surrounding AI may face rounds of scrutinization and require time for market stabilization. In light of these considerations, we believe that well-balanced diversification within the fund will generate superior value for our investors in the current high-volatility market environment. For the month under review, MYR Class returned -4.66% underperforming the DJIDEV index benchmark by 253 basis points. Despite the IT sector's pronounced declines back to May level, the fund managed to successfully deliver net outperformance over the past three months through our efforts to manage our IT positions.

By region, fund underperformance was attributed across regions with Asia Pacific being the largest detractor followed by North America and Europe. Within Asia Pacific, IT sector was the main drag where the fund has overweight position. IT in Asia was the worst due to its semi and IT hardware industry portraying more volatility and lack of large cap software companies which outperformed massively in other region. By sector, outperformance in the defensive sectors such as Healthcare and Financials failed to offset major underperformance in IT sector. Not owning Energy sector was a drag for the month due to market concern around Middle East tension which resulted in rising crude oil price.

The top contributors to the relative performance were Thermo Fischer Scientific and handful of non-holdings including but not limited to Tesla, SK Hynix, and Intel. Despite disappointing guidance cut from Danaher, Thermo Fisher Scientific reported strong earnings which clarified that Danaher guidance disappointment was largely idiosyncratic and life science growth in fact is steadily recovering from its low single digit growth rate. On the other hand, the bottom contributors to the relative performance were Micron and Murata. Both companies reported outstanding earnings beat and revised up FY guidance supported by strong AI demands. However, being AI beneficiaries under the picks and shovels basket which outperformed the broad market YTD, both companies experienced steep multiple compression due to negative market sentiment with concerns around peak of AI capex cycle and the resurgence of DeepSeek moment but this time with a much larger parameter scale Chinese open-source model called Kimi K3.

Cumulative Fund Returns (%)

	YTD	1 Month	3 Month	6 Month

Nomura Asset Management’s 6 Impact Goals

This quarter we continued to work on progressing towards our 6 Impact Goals (as below) focused around the most pressing issues facing our world and where we as investors believe we can have a positive impact across various stakeholders. In 1Q26, 31 of our total engagements were directly aligned to our 6 Impact Goals outlined below. The impact goals are closely aligned with the United Nations Sustainable Development Goals (UN SDGs), and NAM’s ESG Statement. As part of our commitment to deeply integrate our 6 Impact Goals into our processes we strive to further increase our engagements with companies on the selected goals and work together towards achieving progress.

Disclaimer:

Based on the Fund’s portfolio returns as at 30 June 2026, the Volatility Factor (VF) for the Fund is 13.69 and is classified as “High” (Source: LSEG Lipper). “High” includes funds with VF that are between 11.915 and 16.495. The VF means there is a possibility for the Fund in generating an upside return or downside return around this VF. The Volatility Class (VC) is assigned by LSEG Lipper based on quintile ranks of VF for qualified funds. VF is subject to monthly revision and VC will be revised every six months. The Fund’s portfolio may have changed since this date and there is no guarantee that the Fund will continue to have the same VF or VC in the future. Presently, only funds launched in the market for at least 36 months will display the VF and its VC.

This marketing material was prepared by Nomura Asset Management Malaysia Sdn. Bhd. (Registration No. 200601028939 (748695-A)) (“NAMM”) based on data available to NAMM as of 31 July 2026 for information purposes only and is not intended as an offer, solicitation or recommendation with respect to the purchase or sale of any particular investment. This marketing material has not been reviewed by the Securities Commission Malaysia (“SC”). Before investing in Nomura Global Shariah Sustainable Equity Fund (“Fund”), investors are advised to read and understand the contents of the Fund’s Prospectus dated 23 May 2022, First Supplementary Prospectus dated 31 July 2023 and the Second Supplementary Prospectus dated 27 January 2025 (“Prospectus”) and Product Highlights Sheet (“PHS”) which highlights the key features and risks of the Fund. Both the Prospectus and PHS have been registered/lodged with the SC. The authorisation of the Fund and the registration/lodgement of the Prospectus and the PHS should not be taken to indicate that SC recommends the Fund. SC takes no responsibility for the contents of the Prospectus, the PHS and this marketing material; makes no representations as to their accuracy or completeness; and expressly disclaims all liability arising from, or in reliance upon the whole or any part of their contents. Though the information contained herein has been obtained from sources believed in good faith to be reliable upon the issuance date, NAMM reserves the right to make changes or corrections to the information herein at any time without notice. Copies of the Prospectus and PHS can be obtained from our office and application for units can only be made on receipt of an application form referred to and accompanying a copy of the Prospectus. Among others, investors should be aware: i) of the risks and costs involved in investing in the Fund; ii) that the price of units (in the Fund) and distributions payable (if any) may go down as well as up; and iii) that past performance of the Fund and target fund (if any) should not be taken as an indication of its future performance. Investors should make their own risk assessment and seek professional advice, where necessary.
