Nomura Global Shariah Sustainable Equity Fund - MYR Class A

September 2026

Fund Commentary and Strategy

In early September, market was predominantly driven by market expectations into monetary policy announcements from major central banks. The US Federal Reserve, European Central Bank, and Bank of Japan each implemented rate increases, with outcomes broadly aligned to market expectations. While market relieves took place post the rate hike announcements, central banks' data-dependent frameworks, combined with persistent upside inflation risks stemming from resilient aggregate demand and the extraordinary strength in artificial intelligence end-markets, suggest an elevated probability of consecutive rate hikes in the near term. We observe the broad economy to remain resilient; however, this resilience has not been accompanied by multiple expansion, a characteristic typically associated with mid-to-late cycle positioning. As monetary aggregates, particularly M1 money supply, begin to contract, we anticipate a gradual deceleration in business investment activity, with capital projects subject to postponement or disruption. This slowdown will likely be compounded by elevated operational costs, evidenced by elevated freight rates, energy costs, and material input prices. We will closely monitor the implications of these macro developments through Q3 company earnings commentary and policy announcements, particularly given the US mid-term elections scheduled for early November. The intersection of monetary tightening, operational cost pressures, and political uncertainty warrants heightened vigilance. Despite diversifying our information technology exposures across both security selection and tactical allocation, we continue to view the IT sector as the primary area of strategic focus. The recent introduction of AI agents—exemplified by Meta Platforms' Muse—represents a potential inflection point in enterprise and consumer applications. However, we maintain a measured perspective on the pace and magnitude of compute demand that markets have priced in, given the absence of clearly defined, sustainable monetization models at scale. We would be further encouraged if we could see more evidence that AI applications are extended beyond cost savings or productivity gains. For the month under review, MYR Class A rose +2.99%, outperforming the DJIDEV index benchmark by 103 basis points.

By region, fund underperformance was attributed mainly to Nort America given strong allocation. This is followed by better selections in weaker regional performance of Asia Pacific and Europe. By sector, both selection and allocation were positive across most sectors except for Financials and Communication Services. Stronger outperformance was attributed to overweight in IT sector and underweight in Consumer Discretionary. Outperformance with underweight in Materials as gold price reversed post Fed rate hike.

The top contributors to the relative performance were Taiwan Semiconductor and Micron. Taiwan Semiconductor reported strong monthly sales numbers which support the upside ahead of street expectation. Both companies being related to AI trades were well supported by Muse which Meta Platforms introduced as their AI agent. While we think AI agents are tools that would bring great values to enterprise and consumers, we acknowledge that AI agents could also be commoditized like LLM space where we have observed open-source models gaining larger market share from frontier models. On the other hand, the bottom contributors to the relative performance were Novonesis and non-holdings including Meta Platforms and Intel.

Nomura Asset Management's 6 Impact Goals

This quarter we continued to work on progressing towards our 6 Impact Goals (as below) focused around the most pressing issues facing our world and where we as investors believe we can have a positive impact across various stakeholders. In 2Q26, 31 of our total engagements were directly aligned to our 6 Impact Goals outlined below. The impact goals are closely aligned with the United Nations Sustainable Development Goals (UN SDGs), and NAM's ESG Statement. As part of our commitment to deeply integrate our 6 Impact Goals into our processes we strive to further increase our engagements with companies on the selected goals and work together towards achieving progress.

Disclaimer:

Based on the Fund's portfolio returns as at 31 August 2026, the Volatility Factor (VF) for the Fund is 14.02 and is classified as "High" (Source: LSEG Lipper). "High" includes funds with VF that are between 11.86 and 16.705. The VF means there is a possibility for the Fund in generating an upside return or downside return around this VF. The Volatility Class (VC) is assigned by LSEG Lipper based on quintile ranks of VF for qualified funds. VF is subject to monthly revision and VC will be revised every six months. The Fund's portfolio may have changed since this date and there is no guarantee that the Fund will continue to have the same VF or VC in the future. Presently, only funds launched in the market for at least 36 months will display the VF and its VC.

This marketing material was prepared by Nomura Asset Management Malaysia Sdn. Bhd. (Registration No. 200601028939 (748695-A)) ("NAMM") based on data available to NAMM as of 30 September 2026 for information purposes only and is not intended as an offer, solicitation or recommendation with respect to the purchase or sale of any particular investment. This marketing material has not been reviewed by the Securities Commission Malaysia ("SC"). Before investing in Nomura Global Shariah Sustainable Equity Fund ("Fund"), investors are advised to read and understand the contents of the Fund's Prospectus dated 23 May 2022, First Supplementary Prospectus dated 31 July 2023 and the Second Supplementary Prospectus dated 27 January 2025 ("Prospectus") and Product Highlights Sheet ("PHS") which highlights the key features and risks of the Fund. Both the Prospectus and PHS have been registered/lodged with the SC. The authorisation of the Fund and the registration/lodgement of the Prospectus and the PHS should not be taken to indicate that SC recommends the Fund. SC takes no responsibility for the contents of the Prospectus, the PHS and this marketing material; makes no representations as to their accuracy or completeness; and expressly disclaims all liability arising from, or in reliance upon the whole or any part of their contents. Though the information contained herein has been obtained from sources believed in good faith to be reliable upon the issuance date, NAMM reserves the right to make changes or corrections to the information herein at any time without notice. Copies of the Prospectus and PHS can be obtained from our office and application for units can only be made on receipt of an application form referred to and accompanying a copy of the Prospectus. Among others, investors should be aware: i) of the risks and costs involved in investing in the Fund; ii) that the price of units (in the Fund) and distributions payable (if any) may go down as well as up; and iii) that past performance of the Fund and target fund (if any) should not be taken as an indication of its future performance. Investors should make their own risk assessment and seek professional advice, where necessary.
